

I. Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of the Claims

1. (Currently Amended) An air-bag,~~the air-bag~~ comprising at least one inflatable region, the air bag having an upper edge provided with a plurality of mounting tabs, each of the plurality ~~of the mounting tabs having an inclined edge, said inclined edge extending from tabs having an outer edge and an inner edge, the inner and the outer edges extending from the upper edge, wherein the inner edge is nearer a line lying vertically through a central region of the air-bag than is the outer edge, and the inner edge and the upper edge and being inclined to define an angle of less than 90° such that the tabs are inclined inwardly towards the line.~~ with respect to the upper edge, ~~and being inclined inwardly toward a line lying vertically through a central region of the air-bag.~~

2. (Original) An air-bag according to Claim 1 wherein the air-bag is in the form of an inflatable curtain.

3. (Currently Amended) An air-bag according to Claim 1 wherein at least one of the tabs is inclined at defines an angle between 30° and 80°.

4. (Currently Amended) An air-bag according to Claim 1 wherein the upper edge is provided with the tabs including a first group of the tabs positioned near the line lying vertically through the central regioncenter of the air-bag and a

second group of the tabs positioned outwardly from the line lying vertically through the central regioncenter and ~~wherein~~the first group of the tabs; the angle defined by the second group of the tabs being a more acute angle than the angle first defined by the group of the tabs.

5. (Currently Amended) An air-bag according to Claim 1 wherein each of the plurality of the tabs is formed of a woven fabric, the fabric having orthogonal warp yarns and weft yarns, ~~the inclined edge of each of the angle of the tabs forming~~ defining an acute angle with the orthogonal matrix of the warp and the weft yarns.

6. (Cancelled)

7. (Previously Presented) An air-bag according to Claim 1 wherein each of the plurality of the tabs comprises a single layer of fabric forming the air-bag.
